

DOMINIC STANDAGE, Curriculum Vitae

Department of Biomedical and Molecular Sciences / Centre for Neuroscience Studies, Queen's University
Botterell Hall, Room 230, Kingston, Ontario, K7L 3N6, Canada
Tel (+1) 613 217 5138 (c)
Email standage@queensu.ca

Citizenship Canadian / British

EDUCATION

DALHOUSIE UNIVERSITY, HALIFAX CANADA

Doctor of Philosophy, Computer Science, September 2003 – August 2007

Thesis title Mechanisms of short term and long term memory in cortex: neural fields and synaptic plasticity

UNIVERSITY OF WESTMINSTER, LONDON UK

Master of Science, Artificial Intelligence, October 1997- January 2001

Graduated with Distinction

Thesis title An electronic nose: a hybrid neural network architecture to classify bacteria from gas sensor data

DALHOUSIE UNIVERSITY, HALIFAX CANADA

Bachelor of Arts, Psychology, 1988-1991

ACADEMIC POSITIONS

QUEEN'S UNIVERSITY, CENTRE FOR NEUROSCIENCE STUDIES, KINGSTON CANADA

Postdoctoral research fellow, Dept. of Physiology / Dept. of Biomedical and Molecular Sciences, November 2007 – present

Memory, Action and Perception Laboratory / Cognition and Action Laboratory (September 2016 – present)

Acquisition, processing and analysis of resting state and functional MRI and behavioural data, including the use of graph theory (network science) and machine learning methods to construct and characterize distributed networks from whole-brain MRI data during motor learning; Funded by the Canadian Institutes of Health Research (CIHR)

Computational Neuroscience Laboratory (September 2011 – August 2017)

Design, implementation and analysis of neural models of brain function, including biophysical models of intracellular, network and systems-level computations; design and co-supervision of behavioural and electrophysiological experiments to investigate perceptual decision making, learning and working memory. Funded by CIHR and the Natural Sciences and Engineering Research Council of Canada (NSERC)

Visual Information Processing Laboratory (November 2007 – May 2009, February 2014 – August 2016)

Design, implementation and analysis of network and systems-level models of cortical function in the investigation of perceptual decision making and working memory. Funded by CIHR and NSERC

Laboratory for the Neural Basis of Decision Making (May 2009 – January 2014)

Design, implementation and analysis of biophysical and mathematical models of perceptual and economic decision making and interval timing; design and co-supervision of behavioural and electrophysiological experiments. Funded by CIHR, Human Frontiers Science Program, and NSERC

DALHOUSIE UNIVERSITY, FACULTY OF COMPUTER SCIENCE, HALIFAX CANADA

Research Assistant, Computational Neuroscience Group, September 2003 – August 2007

Design, implementation and analysis of computational models of brain function, including the use of mathematical and neural models of attention, learning and working memory. Funded by NSERC

Teaching Assistant, September 2003 – August 2007

Curriculum development, lecturing, teaching tutorials and marking assignments

INDUSTRY POSITIONS

THOMSON SCIENTIFIC, LONDON UK

Business Systems Developer, March 2002 – August 2003

Technical specification and development of internal business systems, including global intranet applications and language translation systems. Platforms include C#, CSS, HTML, JavaScript, MSXML, Oracle Database and Perl on Windows systems

BLOOMS OF BRESSINGHAM LTD, BERKSHIRE UK

Senior Developer / Webmaster, May 2000 – March 2002

Specification, development and administration of all technical facets of online business, transactional processing and financial reporting. Management of contract developers and designers. Platforms include Apache, BASH, CSS, HTML, Java, JavaScript, MySQL, Perl, PHP, PostgreSQL, and XML/XSLT on Linux systems

REVOLUTION LTD, LONDON UK

Senior Developer, September 1997 - May 2000

Software applications specification and development, management of in-house and contract developers, and client liaison. Platforms include CSS, HTML, JavaScript, MySQL, Oracle Database, Perl, PHP, Microsoft SQL Server and XML/XSLT on Linux and/or Windows systems

PUBLICATIONS

MANUSCRIPTS SUBMITTED FOR REVIEW

Dominic Standage, Martin Paré and Gunnar Blohm, Hierarchical recruitment of competition alleviates working memory overload in a fronto-parietal model, *bioRxiv*, <https://doi.org/10.1101/181370>

Dominic Standage and Martin Paré, Slot-like capacity and resource-like coding in a neural model of multiple-item working memory, *bioRxiv*, <https://doi.org/10.1101/181354>

Laura Medlock, Lauren Shute, Mark Fry, Dominic Standage* and Alastair Ferguson*, Ionic mechanisms underlying tonic and burst firing behaviour in subfornical organ neurons: a combined experimental and modeling study (* co-senior author)

T. Scott Murdison, Dominic Standage, Philippe Lefèvre and Gunnar Blohm. Effector-dependent response deterioration by stochastic transformations reveals mixed reference frames for decisions, *bioRxiv*, <https://doi.org/10.1101/193235>

David M. Milstein, Dominic Standage and Michael C. Dorris, Motor planning processes are influenced by the value and timing of potential actions

PEER REVIEWED PAPERS AND EDITORIALS

Dominic Standage, Da-Hui Wang, Richard Heitz and Patrick Simen, Toward a unified view of the speed-accuracy trade-off, *Frontiers in Neuroscience*, 9:139, 2015, doi:10.3389/fnins.2015.00139

Dominic Standage and Thomas Trappenberg, Probabilistic, weight-dependent STDP leads to rate-dependent synaptic fixed points, *Proceedings of the Computational Neuroscience Meeting CNS 2006, Baltimore, USA*

Dominic Standage, Sajiya Jalil and Thomas Trappenberg, A weight-dependent STDP rule leading to rate-dependent synaptic fixed points, *Proceedings of the International Conference of Cognitive and Neural Systems, ICCNS 2006, Boston, USA*

Dominic I. Standage, Thomas P. Trappenberg and Raymond M. Klein, A topographic saliency map that accounts for divided visual attention, *Proceedings of the International Conference on Cognitive and Neural Systems ICCNS 2005, Boston, USA*

SCHOLARLY PRESENTATIONS

INVITED TALKS

Cognitive control of decision making by interval timing, *University of Toronto, Computational Neuroscience Seminar, April*

15, 2015

Optimal decision algorithms implemented in brain circuitry: an exemplary convergence of theory, behaviour and neurophysiology, *SHARCNET Scientific Computing Seminar Series, University of Ontario Institute of Technology, October 3, 2013*

Decisions in space and time: a neural model of the speed-accuracy trade-off, *Queen's University, Department of Physiology Invited Speaker Series, March 8, 2010*

Gain modulation by a signal encoding elapsed time controls the speed-accuracy trade-off in a network model of a decision circuit in LIP, *Queen's Centre for Neuroscience Studies, Neuroscience Research Day, September 24, 2009*

Working memory capability impairs decision making in a biophysical network model, *University of Montreal, Mathematical Neuroscience Group, March 24, 2009*

CONFERENCE ORAL PRESENTATIONS AND OTHER TALKS

Adaptable modular structure in whole-brain functional networks predicts sensorimotor learning, *Queen's Centre for Neuroscience Studies, Friday Fights, January 26, 2018*

Hierarchical recruitment of competition alleviates working memory overload in a fronto-parietal model, *Queen's Centre for Neuroscience Studies, Friday Fights, January 19, 2018*

Feedback inhibition underlies slot-like capacity and resource-like neural coding, *Queen's Centre for Neuroscience Studies, Friday Fights, November 27, 2015*

A local-circuit mechanism for the encoding of elapsed time in the range of hundreds of milliseconds: evidence for generic timing circuitry and implications for decision making, *Annual Retreat for the Computational Approaches in Neuroscience - Action, Control and Transformations Program (NSERC CAN-ACT), Toronto, Canada, September 26 – 27, 2012*

Gain modulation by the encoding of urgency controls the speed-accuracy trade-off in a network model of LIP, *Annual Retreat of the Canadian Action and Perception Network, Ingersol Canada, October 1 – 2, 2009*

A canonical cortical model predicts persistent mnemonic activity in area LIP is afferently driven, *Canadian Physiological Society Meeting, CPS 2009, Mont St. Anne, Canada*

Neural field models of cortical microcircuits: neurons, neural populations and parametric issues, *Queen's Centre for Neuroscience Studies, Friday Fights, February 20, 2009*

TEACHING AND MENTORSHIP

GUEST LECTURING

Queen's University, Centre for Neuroscience Studies, January 2010 - present

NSCI 850: Introduction to Modelling in Neuroscience (graduate)

LSCI 426/826: Current Concepts in Sensorymotor Neuroscience (undergraduate / graduate)

Queen's University, School of Computing, Cognitive Science program, January 2016 – present

COGS 300/3.0: Programming Cognitive Models (undergraduate)

STUDENT SUPERVISION

Research co-supervisor, Queen's University, Centre for Neuroscience Studies

Msc, Neuroscience – Time-variant bounded accumulator models of choice (co-supervising with Gunnar Blohm)

Msc, Neuroscience – Single neuron modelling of neurons in the subfornical organ (co-supervising with Al Ferguson)

B.Sc., Neuroscience, Controlling working memory capacity and overload by reward, September 2016 – May 2017 (co-supervised with Gunnar Blohm and Martin Paré)

B.Sc. Neuroscience (Hons.), Research Thesis: tDCS over FEF modulates decision making, September 2015 – May 2016 (co-supervised with Gunnar Blohm)

B.Sc. Neuroscience (Hons.), Research Thesis: Variability in temporal estimates optimizes decision making, September 2012 – May 2013 (co-supervised with Gunnar Blohm)

Bsc, Neuroscience (Hons.), Research Thesis: The timing of changing evidence affects perceptual decisions, September 2011 – May 2012 (co-supervised with Mike Dorris)

B.Sc. Physics (Hons.), Research Thesis: A flexible model of recurrent spiking neurons with spike-timing dependent

plasticity, January – May, 2011 (co-supervised with Gunnar Blohm)

TEACHING ASSISTANCE

Curriculum development, lecturing, teaching tutorials, marking assignments

Dalhousie University, Faculty of Computer Science, September 2003 – December 2006

CSCI 2132, Software Development, September - December 2006

ECMM 6010, Technology Issues in Electronic Commerce, September 2004 – December 2005

CSCI 1204, Computer Techniques for Health and Life Science, January - May 2004

CSCI 1200, Introduction to Computing for Non-Majors, September - December 2003

ACADEMIC SERVICE

EDITORIAL POSITIONS

Guest Associate Editor, *Frontiers in Neuroscience*

Research Topic, Toward a unified view of the speed-accuracy trade-off: behaviour, neurophysiology and modelling, Eds. Dominic Standage, Da-Hui Wang, Richard P. Heitz and Patrick Simen

PEER REVIEWING

Biological Cybernetics, Brain Research, Cognition, Computational and Systems Neuroscience (Cosyne), European Journal of Neuroscience, Frontiers in Computational Neuroscience, Frontiers in Psychology, Human Brain Mapping, Journal of Neuroscience, International Joint Conference on Neural Networks (IJCNN), Neural Networks, PLoS Computational Biology, Psychopharmacology, Scientific Reports, Workshop on Development and Learning in Artificial Neural Networks (DevLEANN)

COMMITTEE WORK

Postdoctoral representative, Strategic Research Committee, Queen's University, January – July, 2011

Postdoctoral representative, Executive Committee, Queen's Centre for Neuroscience Studies, January – December, 2011

Graduate student rep., Faculty Graduate Committee, Faculty of Comp. Sci., Dalhousie University, Jan – December, 2006

GRANTS AND AWARDS

Maria Sklodowska-Curie Actions individual fellowship, *Visual search and cognitive control of the speed-accuracy trade-off*, co-written with Dietmar Heinke (195,454.80EUR; 2018-2020)

Natural Sciences and Engineering Research Council of Canada operating grant, *Parietal cortex persistent activity and working memory capacity*, co-written with Martin Paré and Kevin Johnston (250,000CAD awarded to Martin Paré, 2009-2014)

Faculty of Graduate Studies Scholarship, Dalhousie University (36,000CAD, 2003-2007)

Postdoctoral travel award, Queen's University (1,000CAD, 2009)

Queen's Centre for Neuroscience Studies, Neuroscience Research Day Award (200CAD, 2009)

Travel Award, 16th Annual Computational Neuroscience Meeting *CNS*2007*, Toronto, Canada (750USD, June 2007)

Travel Award, 9th International Conference on Cognitive and Neural Systems, Boston, USA (750USD 2005)

VOLUNTEER WORK

KINGSTON CLIPPERS SOCCER CLUB

Head Coach, 2002 Girls, January 2010 – August 2015; September 2017 - present

Asst Coach, 1997 Boys, September 2011 – August 2012

Member of Board of Directors, January – December 2011

HALIFAX CITY SOCCER CLUB

House League Coach, May 2006 – August 2007

Assistant Coach, 1997 Boys, September 2006 – August 2007

Member of Board of Directors, December 2006 – November 2007
